

# Tester, the Lord of the Requirements

*How many bugs must a tester discuss,  
Before he learns what's the truth?  
How many times can he nobody trust,  
And ask, how a feature is used?*

*The answer, my friend, is in requirements,  
The answer is in requirements.*

*Yes, and how much must a tester explore  
Before he learns business need?  
Looking for is a difficult chore,  
That makes tester's heart pain and bleed.*

*The answer, my friend, is in requirements,  
The answer is in requirements.*
